Signature of Candidate

Signature of the Invigilator

All questions are compulsory. One option of each question is correct. Choose the correct option.

1. Catastrophism, a term in geomorphology is associated with
(A) Baron Georges Cuvier (B) William Thornbury
(C) William Morris Davis (D) James Hutton
2. Thermal convection current theory of Arthur Holmes is associated with
(A) Mountain building (B) Fluvial plain formation
(C) Desert landform (D) Global warming
3. Which of the following River in India is a good example of braided river
(A) Brahmaputra (B) Periyar
(C) Cauvery (D) Narmada
4. A River from the following list is not an example of antecedent river in India
(A) Ganga (B) Brahmaputra
(C) Sutlej (D) Teesta
5. What process takes place during the youthful stage of a river?
(A) Valley deepening (B) Valley widening
(C) Meandering (D) River rejuvenating
6. One of the following statements related to climate change in India is not correct
(A) There is evidence of warming of Indian Ocean
(B) India's average temperature has risen by 4°C during 1901–2018.
(C) There is decline in summer monsoon
(D) Rising frequency of frequent dry spell
7. Which of the following States receives rainfall due to western disturbances?
(A) West Bengal (B) Punjab
(C) Kerala (D) Gujarat

8. Layers of atmosphere in which Ozone layer lies is
- (A) Troposphere (B) Mesosphere
(C) Stratosphere (D) Exosphere
9. An Ocean current that brings warm water to the eastern coast of the United States is
- (A) Labrador current (B) Counter equatorial current
(C) Gulf stream (D) Canaries current
10. The impact of cyclones and tsunamis in India can be reduced by
- (A) Tropical deciduous forest (B) Tropical Thorny and Scrubs Forest
(C) Mangrove forests (D) Montane forest
11. A place of constant intermingling of fresh water and salt water is called
- (A) Gulf (B) Delta
(C) Estuary (D) Bay
12. Moraines are formed by
- (A) Glacial action (B) Fluvial
(C) Wind (D) Underground water action
13. Which of the following measures may not help to enhance carrying capacity of a region or state
- (A) Raising agriculture productivity (B) Remittance by citizen out migrated for job
(C) Grant -in Aid from external agencies (D) Immigration of people
14. Black soil is not suitable for
- (A) Cotton (B) Groundnut
(C) Sugarcane (D) None of the above

15. Which among the following schemes of Government of India comes under Clean Development Mechanism of the Kyoto Protocol?
- (A) National Solar Mission
(B) Compact Fluorescent Lamp (CFL)
(C) Jawaharlal Nehru National Urban Renewal Mission
(D) Akshay-Prakash Yojna
16. Which of the following economic activities is discussed as ecologically suitable for Northeast India
- (A) Rubber plantations (B) Palm oil plantations
(C) Shifting cultivations (D) Rat-hole coal mining
17. To the theory of demographic transition India is placed in
- (A) First stage (B) Second stage
(C) Third stage (D) Fourth stage
18. Which among the following reasons contributed most to population growth in Assam/Northeast India during 2001- 2011 Census.
- (A) Higher fertility (B) Immigration from neighboring countries
(C) Immigration from other parts of India (D) None of the above
19. The concepts of thresholds and range are associated with the following theory
- (A) Industrial location (B) Von Thunen Model
(C) Concentric zone theory (D) Central Place Theory
20. Which of the following approach would be suitable to reduce fertility rate in a democratic country?
- (A) Higher work participation rate of women
(B) Stringent family control measures
(C) Disincentive for having larger family
(D) Preventing school dropout rate of girl child

21. The method of mapping depends on the
(A) Size of the area (B) Degree of accuracy aimed at
(C) Amount of details required (D) All of the above
22. The network of the parallels and meridians so formed in a map projection is called
(A) Graticule (B) Longitude
(C) Latitude (D) Equator
23. A projection in which the correct shape of a given area of the earth's surface is preserved.
(A) Homolographic Projection (B) Orthomorphic Projection
(C) Azimuthal Projection (D) Equidistant Projection
24. Which of the following are the examples of small scale maps?
(A) Wall maps (B) City plans
(C) Atlas maps (D) Both (A) and (C)
25. An imaginary line drawn on a map joining all places with the same temperature
(A) Isobar (B) Isotherm
(C) Profile (D) Contour
26. Maize is a rapidly expanding crop cultivated in Assam at present. Which of the following crops farmers most likely to replace to cultivate Maize?
(A) Tea (B) Rubber
(C) Bamboo (D) Autumn paddy
27. The place Lepetkata, in Dibrugarh district of Assam is known for
(A) Petrochemical complex
(B) Tea value addition center
(C) Intensive rice cultivation
(D) Floods and Riverbank erosion management project

28. One of the following states of Northeast India has adopted a New Land Use Policy to create opportunities for farmers beyond hill agriculture; name the state
- (A) Nagaland (B) Manipur
(C) Mizoram (D) Tripura
29. Agriculture practices of Apatani people of Ziro valley in Arunachal Pradesh is considered one of the highly energy efficient farming activities in India; what are the products involved in Ziro valley farming system
- (A) Paddy, Kiwi (B) Paddy, small millet
(C) Paddy, fish (D) Paddy, fish, small millet
30. The hub of rubber production in Northeast India is the state of
- (A) Tripura (B) Mizoram
(C) Meghalaya (D) Assam
31. To measure and compare consistency in distribution of rainfall in two places which statistical method is used
- (A) Arithmetic mean (B) Geometric Mean
(C) Standard deviation (D) Coefficient of variation
32. In time and resource constraints situation, which of the following approach would help to find a close figure of school dropout of girls after primary level in a village having about 100 households?
- (A) Visit the village headman
(B) Visit the village primary school
(C) A systematic sample survey of the households
(D) A visit to the Anganwadi centre
33. To measure the outcome of expansion of irrigation provisioning on changes in foodgrain production which statistical methods would be appropriate
- (A) Correlation (B) Gini Coefficient
(C) Regression analysis (D) Geometric mean

34. What is the root cause of conflict in Middle East region
- (A) Poor level of human development (B) Weak governance
(C) Poverty (D) In congenial environment for investment
35. The prime factor for South Korea's growth in industrialization is
- (A) Abundant energy resources and raw materials
(B) Abundant labour
(C) Research and development in industrial sector
(D) All of the above
36. One of the Southeast Asian countries cropping pattern now see concentration of palm plantations for oil, which ends ecological and agriculture diversity
- (A) Malaysia (B) Indonesia
(C) Philippines (D) Vietnam
37. Broad classification of Modern Indian Languages do not include one of the following family of languages
- (A) Austric (B) Sino-Tibetan
(C) Dravidian (D) Arawakan
38. The UNDP's Sustainable Development Goals have the following numbers of Goals
- (A) 14 (B) 17
(C) 7 (D) 16
39. The disadvantages of generation of solar energy in India are
- (A) Space and availability of continuous sunshine
(B) High initial investment
(C) Maintenance and services
(D) All of the above

40. One of the following indicators is not considered by UNDP to measure human development index
- (A) Mean years of schooling (B) Expected years of schooling
(C) Life expectancy at birth (D) Per capita public expenditure on health care
41. *Jiadhal*, a tributary of the Brahmaputra often in news during the monsoon, is in district of -
- (A) Marigaon (B) Hailakandi
(C) Dhemaji (D) Dhubri
42. Which Forest is planted by a human being
- (A) Barnadi forest (B) Molai forest
(C) Barail forest (D) Dihing forest
43. Assam cultivates paddy in three seasons; area under paddy in a particular season shows decline in recent times
- (A) Winter paddy (B) Autumn paddy
(C) Summer paddy (D) Both Summer and Winter paddy
44. The reason for closure of two public sector paper mills in Assam is
- (A) Lack of locally available raw materials
(B) Lack of labour
(C) Intermittent power supply
(D) Ineffective management
45. Toklai, a place (also a River) close to Jorhat town of Assam known for
- (A) Airport (B) Intensive rice cultivation
(C) Tea research (D) Fertiliser manufacturing

46. The author of 'Anthropogeographie' is
(A) Ratzel (B) Ritter
(C) Richtofen (D) Humboldt
47. The term 'Social Darwinism' is given by
(A) Herbert Spencer (B) Ratzel
(C) Darwin (D) Huntington
48. The idealized model on development of relief in landscapes is associated with
(A) W M Davis (B) A V Humboldt
(C) Yi-Fu – Tuan (D) Carl Ritter
49. Mark the odd one in discussion of dualism and dichotomies in geography
(A) Systematic Vs Regional Geography (B) Ideographic vs Nomothetic
(C) Ecology and Ecosystem services (D) Physical and Human Geography
50. The Schaefer -Hartshorne Debate is related to
(A) On dichotomy of determinism and possibilism
(B) the methodology of pursuing geographical studies
(C) the approach to climate change studies
(D) industrial locations in liberalised world
